QUALITY AND COST-EFFECTIVE DECORATIVE AND SAFETY SOLUTIONS FOR YOUR ASPHALT AND CONCRETE SURFACES

DECORATIVE & SAFETY SURFACING

ENDURABLEND™ POLYMER CEMENT SURFACING

SEALS PROTECTS ENDURES
Endurablend is a Micro-Surfacing system that is unlike anything else in the industry. Endurablend is comprised of a specially formulated polymer modified cement mixed with fibers and aggregates that is spray applied to both asphalt and concrete pavements for decorative & safety applications.

**APPLICATIONS**

- Crosswalks
- Pedestrian Plazas
- Logos & Custom Designs
- Medians
- Intersections
- Traffic Calming
- Sidewalks
- Solar Reflective Coating
- And More...

**FEATURES**

- Holds Up to Heavy Traffic and Extreme Weather
- Seals & Protects Surface From:
  - Salts & De-icing Materials
  - Petroleum & Oils
  - UV Light
- Create Virtually any Color, Texture, or Pattern you Desire!
- Certified Global Installers

Can be applied to both asphalt and concrete pavement in a variety of colors, patterns, and textures.
ENDURABLEND
SOLAR REFLECTIVE COATING

In the summertime, asphalt pavement can reach temperatures of 120 to 150 degrees Fahrenheit (50 to 65 degrees Celsius), resulting in increased energy costs and poor air quality.

Using Endurablend with an infrared reflective pigment reduces solar absorption and increases solar reflectivity, therefore reducing asphalt pavement temperatures. This results in a lower heat index, lower energy costs and improved air quality.
